

ABSTRACT

5 A control device of a multicylinder internal  
combustion engine (1) provided with a valve operating  
characteristic control means (9) for controlling a valve  
operating characteristic of at least one of an intake  
valve (2) and exhaust valve (3), which estimates an  
intake difference of cylinders and limits a control range  
of said valve operating characteristic in accordance with  
10 said estimated intake difference.
